70% in CBSE Boards

PROJECTS

HRIS - Employee Management Portal

- Developed an authentication-based HRIS (Human Resource Information System) for comprehensive employee management, including employee details, leave requests, payroll processing, and attendance tracking.
- Implemented daily attendance tracking features that allow employees to check in and out, along with a streamlined leave application process with team lead/senior approval or rejection capabilities.
- Created modules for team leads and managers to monitor and update employee performance metrics on a daily basis.
- Utilized a tech stack including ReactJS, SCSS, PHP, and MySQL.

Talentfiner.com - EdTech Platform

- Developed an EdTech platform allowing users to explore, view, and purchase courses, providing a seamless and intuitive experience for educational content discovery and enrollment.
- Integrated secure payment processing with Razorpay, ensuring efficient and safe transactions for users purchasing courses.
- Leveraged a tech stack consisting of ReactJS for the frontend, SCSS (Sass) for styling, PHP for the backend, and MySQL for the database.

Giigbit - Job Portal for Job Seekers and Recruiters

- Developed a comprehensive job portal serving both job seekers and recruiters, enabling users to efficiently find the ideal job or candidate.
- Implemented features to provide a seamless, personalized job exploration experience, including advanced search filters, job recommendations, and candidate matching capabilities.
- Tech stack including ReactJS, SCSS (Sass), Node.js, Express and MongoDB.
- [View here](#)

Honeytradi - Crypto Trading Signals Platform

- Developed a real-time crypto trading signals platform to assist users in optimizing their trading strategies through automated buy signals and market insights.
- Executed automated status updates for signals based on real-time market conditions, ensuring users receive timely, accurate trading advice to enhance decision-making.
- Utilized a tech stack including ReactJS, SCSS (Sass), Node.js, Express and MongoDB.
