MySQL

PERSONAL PROJECTS

Clone of Myntra's Website

- Implemented key pages (Home, About, Log In, Cart) with a focus on responsive design.
- Enhanced user interactivity through dynamic features.

3D Portfolio Website

- Conceptualized and designed a 3D portfolio website using ReactJS.
- Implemented various components, each uniquely crafted to showcase something unique.
- Integrated 3D objects into the website using libraries like three.js and styled components.
- Explore the immersive experience [here](#).

Dynamic Blog Website

- Designed and implemented various pages, including blog posts, category pages, and user profiles.
- Utilized Next.js's dynamic routing to create a seamless and organized user navigation experience and ensured each page follows responsive design principles for a consistent user experience across devices.
- Leveraged Prisma to interact with MongoDB, managing data for different pages efficiently.
- Incorporated server-side rendering in Next.js for enhanced performance.

CarsHub

- Crafted a dynamic car hub website using Next.js, TypeScript, and Tailwind CSS, ensuring a modern and responsive design.
- Integrated libraries like Headlessui to enhance user interface components and interactions.
- Leveraged API calls to fetch and display comprehensive information about cars, including images, for an enriched user experience.
- Explore the website [CarsHub](#).

INTERNSHIPS

Completed one month internship at Dekeract Private Limited.

Developed an e-commerce website leveraging WordPress, Elementor, and other advanced plugins.
